- MongoDB
- Firestore

Mobile

- Flutter

Programming

- JavaScript
- Python

Tools

- Git, GitHub
- Vite

Education

B.E. Information Technology

A.C. Patil College of Engineering
2025
62.35%

Diploma in IT

VPM Polytechnic, Thane
2022
78.69%

Certifications

- Generative AI Mastermind — Out-skill
- ML & DL Seminar — CSI Dept.
- Aavishkar Research Poster Convention

Professional Summary

Full Stack Software Developer skilled in building scalable web and mobile applications using React.js, Node.js, and Firebase. Experienced in cross-platform development with Flutter and implementing AI-based features. Passionate about developing high-performance, user-centric applications.

Projects

React E-Commerce Platform

- Developed a responsive e-commerce platform using React + Vite and Firebase.
- Implemented secure authentication, product catalog, and cart functionality.
- Used Redux Toolkit for efficient state management.
- Designed responsive UI using Tailwind CSS.

Food Delivery Mobile Application

- Built a cross-platform food delivery app using Flutter and Firebase.
- Implemented authentication, cart system, and real-time order tracking.
- Integrated payment flow and generated digital order receipts.

Placement Management System

- Developed a full-stack placement portal using MERN stack.
- Enabled student profile management and job tracking.
- Implemented AI-based job matching functionality.

Highlights

- Built scalable full-stack applications with modern frameworks.
- Developed real-time systems using Firebase.
- Strong understanding of responsive design and UI performance.
- Experience integrating AI-based features into applications.
